

Unilabs to Exhibit at the 56th Annual European Human Genetics Conference in Glasgow, Scotland

Geneva, 1 June 2023: Unilabs, a leading international provider of diagnostic services, will exhibit at the 56th annual European Human Genetics Conference (ESHG) in Glasgow, Scotland, from 10-13 June. Attendees can visit Unilabs Genetics at stand 274.

The ESHG conference is a major scientific and professional event in human genetics, bringing together European and international geneticists.

"We are delighted to be part of the annual European Human Genetics Conference again and look forward to meeting with geneticists and industry professionals from across the world. The event gives us the opportunity to showcase our extensive genetic testing services and explore partnership opportunities," said Unilabs' President - Scientific Business Units and Chief Medical Officer Dr Christian Rebhan.

Unilabs Genetics provides access to a test menu of more than 4,000 genetic tests, with over 100 genetics specialists and genetics laboratory professionals serving customers in over 70 countries.

"At Unilabs Genetics, we are committed to constantly evolve our test offerings and adopt the latest technologies to meet the demands of patients, healthcare providers and Pharma, in terms of capabilities, quality, and cost-efficiency. Our team of specialists will be available to discuss with the medical genetics' community our genomic solutions, supporting clinical and research projects, as well as daily clinical practice," added Unilabs' Head of Genetics Dr Nicolas Stephanou.

About Unilabs

Unilabs is one of Europe's leading medical diagnostics companies, offering a complete range of laboratory, pathology, genetics, and imaging services to patients across four continents.

With over 13,000 people in 16 countries, Unilabs invests heavily in technology, equipment, and people – using digital technologies in its state-of-the-art laboratories and imaging institutes – to improve the lives of close to 100 million people every year.

About Unilabs Slovensko, s.r.o

Unilabs Slovakia is a private laboratory company based in Slovakia employing more than 1,000 people. It has been operating for 25 years with contracts signed with more than 6,500 doctors in 4,000 clinics, 124 hospitals and bed facilities.

It provides all laboratory medical services, such as clinical biochemistry, haematology, transfusion medicine, immunology, allergology, clinical microbiology, pathological anatomy, and medical genetics. Its laboratories test more than 34,000 samples daily, carries out 103,000 examinations for 12,700 patients and performs up to 37,5 million procedures annually.

Unilabs Slovakia is continuously expanding its range of examinations as it introduces modern diagnostic methods. They use the latest-generation equipment and applies only technologies that have been certified by the European Union.

It is operating a fully automated Aptio Automation line, produced by Siemens Healthineers from its central laboratory in Stropkov, Slovakia, with another laboratory to be coming online in Bratislava during 2023. At full capacity, Aptio processes more than 8,720 tests per hour.
